Recent events

Bartimeus

In February 2026, I visited Bartimeus, a Dutch institute for people with vision impairment. I had an opportunity to speak with CVI experts about their approach to assessing and managing children with CVI.

Insight

In March 2026, I attended the Insight convention, where CVI experts from across the world got together to share their ideas and research.

Free CVI Webinar

I organised a webinar to raise awareness about CVI amongst eye care professionals. It was very well attended with attendees from across the UK and beyond from different professional backgrounds, such as optometrists, low vision practitioners, ophthalmologists, orthoptists, eye clinic liaison officers and rehabilitation workers. Thank you to all who attended and engaged in the Q&A session at the end.

Webinars for eye care professionals

Later in the year, the RNIB is hosting two CPD accredited webinars about CVI, where I will be the speaker.

Upcoming events

'Tunnel Vision in the Classroom': Webinar for parents, carers and teachers 21st May 2026

I am hosting another webinar, which is suitable for parents, carers and teachers of children with CVI-related visual difficulties. Sign up: <https://forms.office.com/r/kmJ66cT71W>

Website

Blogs

My website has a new 'blogs' section. I am still adding more content to my low vision and CVI blogs, but I have also introduced blogs for eye care professionals. The first two series are about 'assessing children with additional support needs', and 'screening for CVI'. Let me know if there are any other topics you would like me to write about!

CVI screening and assessment

If you have visual difficulties which are not related to an eye condition (or you know someone who has), you may want to consider a CVI screening assessment. I can then advise you whether you are likely to benefit from a full CVI assessment. For those who already have a CVI diagnosis, I recommend skipping that stage. Contact me for more information about referral, screening and assessment.
